These guidelines are intended to assist providers who are applying to AANA for prior approval of an anesthesia inservice program they want to present at a future date. Prior approval cannot be awarded to inservice CE programs that have already been presented. Life support courses and seminars cannot be included in the inservice program approval. CE programs and provider-directed independent study/home study programs each have their own specific application guidelines which can be viewed along with the AANA Continuing Education Program, on the AANA website at www.aana.com by going into CE and Education, Continuing Education, Prior Approval Applications.

Program Coordinator

The program coordinator is the individual who will be the liaison between the provider and the AANA. This individual receives the AANA approval notice and all correspondence related to the program. It is important to include the following information for the coordinator on the application form: a phone number, fax, or email address where the coordinator can easily be reached by the CE Department during the hours of 8:00 am to 4:00 pm, Central Time.

The CE Department must be notified of any changes affecting its communication with the provider or program coordinator such as a change in the mailing address, telephone number, administrative structure, the individual responsible for coordinating the CE program and recordkeeping, or any other information pertinent to the program.

Application Submission

Please progress through this online form at your own pace. Required application materials can be attached to this application during the next steps. This form will not be submitted to AANA until you have reached the end of the application and your additional materials and associated application fee have been submitted. Until that time, all of your entered information will be stored on the site, and you will be able to move forward and backward throughout the application process until submission. This application is best used on a PC or Mac—mobile devices are not recommended.

Credit card payment is requested at the end of the application process. The fee applies to each application submitted. NOTE: The fee is nonrefundable and nontransferable.

IMPORTANT: Before starting on the application, click here to read the full set of submission requirements.

Materials to Submit with the Application

A. Application fee. See the CE Payment form located on www.aana.com for fee and payment information. Fees can be paid by credit card, check, or money order made payable to the AANA. The CE payment form must be completed and submitted with the application. The fee is nonrefundable and nontransferable if the application does not meet the CE requirements or the provider withdraws the application.

B. Program Outline and Documentation Form. The required information, as listed on the forms or below, may be submitted using one of the options listed on page one under Application Submission or in any other documents as long as all the required information is included. These materials must be typed.
1. The title of each presentation, such as journal club, M and M conference or the topic of each lecture in the program if specific lectures are planned; Life support courses and seminars cannot be included in the inservice program approval.

2. A brief description of the content to be presented. The relationship of the content to nurse anesthesia practice must be clear, as reflected in the purpose, learner objectives, and program content outline.

3. An hour-by-hour breakdown of the program and the time of each presentation in minutes. List the begin and end time and day during the month that each inservice segment will be presented. For example: M and M conference, first Thursday of each month, 6:30-7:30 am, 60 minutes; journal club, second and fourth Wednesday of each month, 4-5 pm, 60 minutes. One CE credit is awarded for each 60 minutes of presentation. Partial credits are awarded in 0.25 increments. Partial hours not listed in 0.25 increments are rounded down to the next 0.25 increment. The number of credits reflected in this program schedule must match the number of credits requested on the application and the application fee per credit.

4. A minimum of four general outcomes for each part of the inservice program. Submit four general outcomes for a morbidity and mortality conference, four general outcomes for a journal club, etc. The terms "learner objectives" and "learner outcomes" are used interchangeably in the AANA Continuing Education Program. The objectives should be written as statements that identify the participant's expected mastery after attendance at the program.

   • Example of a correctly written learner objective: At the conclusion of this presentation, the participant should be able to calculate the appropriate drug dosage for the new anesthetic agent based on the patient's weight.

   • Presenter's goals are not acceptable learner objectives. For example, "To inform the nurse anesthetist about the latest trends in outpatient surgery" is the goal of the presenter, not a measurable learner objective.

   • Inservice programs with specific planned lectures that are presented on a weekly or monthly basis must have one specific learner outcome for each selected topic for which CE credit is requested.

5. Teaching methods. Audio and videocassettes, interactive video instruction, CD-Rom, DVDs or other similar materials, as well as participation in teleconferences and demonstrations, may be submitted as content only if a moderator or facilitator is present to lead a discussion, answer technical questions relative to the presentation, hand out evaluations, and record attendance. The materials may take the place of an in-person lecturer; they cannot be approved by themselves.

6. All approved providers must ensure that all continuing education activities are free from bias and all presenters (faculty) must declare vested interests. In the event that any form of commercial support is provided for an education activity, the provider must maintain control of the educational content and disclose to the learners all financial relationships or lack of, between the commercial supporter and the provider or presenters. Relationships that could influence conduct and choices of faculty because of vested interests must be disclosed.

C. **Copy of the assessment/evaluation instrument** that will be issued which enables all participants to assess the following: (1) learner's achievement of each objective; (2) teaching effectiveness of each faculty member or presenter; (3) relevance of content to objectives; (4) effectiveness of teaching methods; (5) appropriateness of learning environment; (6) state one item learned that will improve participants nurse anesthesia practice; and (7) state any barriers to implement what is learned.

The assessment/evaluation instrument must also include a field for the participant's name and AANA ID#, as completion of the evaluation tool is required to receive CE credit.
D. Beginning August 1, 2016 the National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA) will require 60 hours of Class A credits over a 4-year recertification cycle. Class A credits are earned from assessed continuing education. An assessment can take many forms, such as multiple choice questions, simulation demonstrations, case studies, or self-assessment.

Assessment Method. Program providers should address their selection of assessment type/format as well and explain how it supports the learning objectives for the activity. Provide a description of the assessment method that will be used to measure the level of learning attained in the program. Examples include: skills check-off, discussion or question/answer session, or post-test. If an assessment instrument is used, a copy must be provided with the prior-approval application.

Criteria:

a. The assessment method must not only meet the needs of the participants but also support current practice for nurse anesthetists in education, administration, research, or clinical practice.

b. Assessment methods must support and facilitate learner engagement and maximize the achievement of identified objectives.

c. The assessment for the CE activity must be consistent with the learner objectives and appropriate to the content being presented.

d. The minimum acceptable form of assessment identifies how the learning activity informs and/or improves practice is self-assessment.

E. **Copy of the certificate of completion** to be issued to all participants, including nurse anesthetists - both AANA members and nonmembers - who participate in the program and complete the assessment/evaluation instrument. The AANA logo cannot be used on any certificates for programs that are not sponsored by the AANA. Certificates must contain the following information:

1. Name of participant;
2. AANA ID number;
3. Name, city, and state of program provider;
4. Title of CE program;
5. Date of CE program;
6. City and state for location of CE program;
7. Number of Class A CE credits awarded to the individual;
8. AANA code number and expiration date;
9. Number of Class A CE credits approved by AANA;

Note that items 8 and 9 need to appear in the AANA prior approval statement as shown in the following format:

This program has been prior approved by the American Association of Nurse Anesthetists for XX Class A CE credits; Code Number XXXXXXX; Expiration Date XX/XX/XX.

F. **CE content areas on certificate of completion.** Several state boards of nursing require documented credit in specific content areas in order for a nurse anesthetist to renew their APRN license. Although this is not mandatory, we do suggest that the number of CE credits earned during your program in content areas such as pharmacology, HIV/AIDS or legal issues be designated on the certificate of completion to the nurse anesthetist. This will provide the CRNAs with the documentation they are required to submit without the need to contact you after the program for this information. Note: While the AANA approves
Random Audits

The AANA CE Department will conduct random and targeted audits to determine compliance with AANA prior approval requirements and provider responsibilities. A program provider audited by the AANA must provide any or all of the documentation stated in Standard XI: Recordkeeping of the AANA CE Program as requested within 30 days of the request. Failure to meet the deadline may result in revocation of approval and no refunds will be made. The AANA reserves the right to deny, revoke or suspend approval based on non-compliance or non-responsiveness of the provider.

Receipt of Materials Verification

For verification of receipt of materials in the CE Department: use overnight mail service. Because of the large volume of mail the CE Department receives, phone, fax, and email confirmations for receipt of materials is not possible.

Application Processing

Applications for prior approval are reviewed thoroughly before approval is awarded. Providers will be notified within 30 working days if the application is not complete and given an opportunity to submit additional materials. The information must be received before presentation of the CE program. Prior approval will not be awarded until the application is complete.

The approval will be effective as of the date the application is complete, not the date the application was initially received by the CE Department. If the material is not received before the start of the program, processing will not continue and the application is considered inactive.

Prior Approval Notification

The notification that a CE program has been awarded prior approval contains the assigned AANA code number, the number of CE credits awarded, the date of AANA approval, the program approval and expiration dates, the provider's recordkeeping and participation recording responsibilities, an AANA completion record, and all other information pertinent to the approval.

Prior approval is granted only for the date(s) of the presentation the provider indicated on the application. The CE activity may not be presented at any other time unless the CE Department is notified and approval is granted before the start of the presentation. Prior approval will not exceed one year.

The code number is assigned a specific date range and maximum number of credits and can be used only for the date(s) and CE credits shown on the approval notice. It must appear on all correspondence, promotional materials, completion records, and certificates of completion. If a provider has a CE program approved for a year and it is offered in multiple locations, the nurse anesthetist will be eligible to receive the maximum number of credits only one time under the program’s code number.

Changes in Prior-Approved Programs

Minor changes in content can be undertaken without additional committee review, provided they involve improvement and comply with the standards for approval.

The number of CE credits originally prior approved cannot be changed unless the provider receives prior approval from the Continuing Education Department. A portion of a program, rather than the entire program, may not be presented unless prior approval is awarded.

Renewal of Inservice Programs

To renew an inservice program without interruption, it is the provider’s responsibility to submit a prior approval application approximately 3 months before the inservice expiration date. Turnover of secretarial personnel or the appointment of a new inservice coordinator does not relieve the provider of the
responsibility to reapply for approval before the program expires. CE inservice programs cannot be offered under the provider’s code number once it has expired.

**Prior Approval Announcement**

The AANA CE Program **does not award** CE units (CEUs), continuing medical education credits (CMEs), or continuing education points (CEPs). These designations are **not** interchangeable with the terms CE credit or contact hour and are not permitted for use on the certificates of completion. The announcement of AANA prior approval that appears on the certificate of completion and all other materials must contain the following information:

- This program has been prior approved by the American Association of Nurse Anesthetists for XX Class A CE credits; Code Number XXXXXXX; Expiration Date XX/XX/XX.

The use of any statement such as “AANA approval pending” or “approval applied for,” is not permitted on any materials or promotional literature; it is misleading and can be considered false advertising.

**Provider Recordkeeping Responsibilities**

The provider is responsible for submitting the completion record and issuing certificates of completion to all attendees. Nurse anesthetists attend AANA prior-approved programs with the expectation that their CE credits will be recorded in a timely, accurate manner so that their recertification renewal is not delayed. The process required for recording participation and issuing certificates of completion is sent to the provider with their approval notice and is available on [www.aana.com](http://www.aana.com) by going into CE & Education, Continuing Education and Prior Approval Application.

**Notice of Denial of Approval**

The CE Department will notify the applicant in writing if the CE program or any part of the program is denied. The notice will briefly state the reasons for the denial and will advise the applicant of the right to seek reconsideration by the CE Committee.

**Reconsideration**

An applicant may request reconsideration of a CE Committee decision by submitting a written request within 30 days after the date on the denial notice sent to the applicant. The applicant must provide the CE Committee with the reasons that he or she believes that the denial of approval was inappropriate and a description of modifications made to the program to correct any cited deficiencies. The applicant may appear before the CE Committee or may submit written materials to the CE Committee to address the identified problem areas.

The CE Committee will notify the applicant of its decision regarding reconsideration of the denial of the applicant’s CE program. If the CE Committee affirms the denial of the applicant’s CE program, the notice will briefly state the reasons for affirming the denial and will advise the applicant of the right to appeal the decision to the Continuing Education Appeals Panel (the “CEAP”). The applicant may appeal an Adverse Determination only after (a) the applicant has filed a timely request for reconsideration, and (b) the CE Committee has affirmed its initial decision to deny approval. The CEAP does not award CE credit.

**Failure to Comply with Provider Responsibilities**

If a CE provider fails to comply with the AANA’s *Continuing Education Program* standards, or fails to meet any of the recordkeeping responsibilities, the CE Committee may withdraw its approval of the CE activity. The provider will receive 30 days written notice of the specific charges and the reasons for withdrawal and will have a reasonable opportunity to respond and be heard by the committee.

If the CE Committee withdraws its approval, the provider may formally appeal the action to the AANA’s Continuing Education Appeals Panel within a 30-day period.
