AANA Journal Mission Statement

AANA Journal promotes the art and science of nurse anesthesia practice in the most evidence-based and systematic manner possible. Nurse anesthetists are involved in a wide range of healthcare delivery interventions including providing anesthesia, critical care, pain management, patient-and-provider education, and administrative leadership. The Journal brings illumination to the spectrum of responsibilities of the nurse anesthetist by marshaling knowledge derived from state-of-the-art reviews, commentaries, and both clinical and laboratory studies. The principal trajectory of AANA Journal is to advance patient safety.
