Certified Registered Nurse Anesthetists (CRNAs) have a strong influence on purchasing decisions regarding anesthesia equipment and supplies. CRNAs are highly valued in today’s healthcare environment because they deliver the same safe, high-quality anesthesia care as their physician counterparts but at a lower cost, helping to control rising healthcare costs. CRNAs are trained to administer every type of anesthesia to all types of patients in any healthcare setting where anesthesia is delivered.

CRNAs administer more than 45M anesthetics each year in the US.

CRNAs have prescribing authority in 34 states:

- Alaska
- Arizona
- Arkansas
- Colorado
- Connecticut
- Delaware
- District of Columbia
- Florida
- Hawaii
- Idaho
- Illinois
- Iowa
- Kentucky
- Louisiana
- Maine
- Massachusetts
- Minnesota
- Missouri
- Montana
- New Hampshire
- New Jersey
- New Mexico
- North Dakota
- Ohio
- Oklahoma
- Oregon
- South Dakota
- Tennessee
- Texas
- Vermont
- Virginia
- Washington
- West Virginia
- Wisconsin
- Wyoming

Prescriptive authority is not the same across all states.

MILLIONS OF AMERICANS RELY ON CRNAs for their anesthesia care, especially maternity/obstetrics, military, elderly and those in rural areas.

66% of CRNAs make purchasing decisions for products and services between $100,000 - $5M.

In some states, CRNAs are the sole provider in 100% of rural hospitals.

AANA represents more than 57,000 CRNAs and student registered nurse anesthetists.

90% OF ACTIVE CRNAs
