Blue Nine Systems, LLC has developed and deployed their platform to
support healthcare providers in managing their MIPS-related
requirements. Their platform includes features such as:

- **Inpatient Post-Discharge Patient Assessment**: To assess and
  monitor patient outcomes after hospital discharge.
- **Ambulatory Post-Discharge Patient Follow-Up**: To track
  patients' health after they leave your facility.

## Disclaimer

Each vendor has reviewed their organization's information and provided confirmation of accuracy. Information included in this document is intended to provide insight into the timeliness, quality, and accuracy of the eligible clinicians', group, and/or virtual group's data provided for reporting, and the requirements for participation in MIPS. These requirements include that the QCDRs provide performance category feedback at least four times a year for all MIPS Quality Measures. The inclusion of an improvement activity ID on this list indicates that the improvement activity is supported by an appropriate measure in one or more of the data sources. Participation in an improvement activity is required in order to be recognized for the improvement activity. The improvement activities associated with each QCDR are defined in the QCDR Eligible Provider's Guide and are available at [http://www.aqihq.org](http://www.aqihq.org) and [http://www.medaxion.com](http://www.medaxion.com).
